Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on July 7, 2005 has been entered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 71-121 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,357,620

Art Unit: 3727

in view of Morano (5,542,670) or Belcastro (5,890,620). Regarding claims 71 and 82, Patent '620 discloses all of the structure except for the spout on the cap and the hole for air. The sealing member with a post is the blocking member in '620 and the anti-inversion member is the flow bridge. Morano and Belcastro disclose similar no-spill drinking apparatus with caps having a spout and a hole for air. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the use of a spout and a hole for air as disclosed by Morano or Belcastro in the apparatus disclosed by '620 to allow for more efficient drinking from the apparatus and passage of air through the apparatus to allow venting.

Regarding claims 72, 76, 78-81, 83, 87, 89-92, 94, 95, 99 and 101-103, the '620 Patent as modified by Morano or Belcastro, discloses all the required structure.

The remaining claims are dependent on independent claim 71 or 82.

4. Claims 82-93, 107-109 and 116-118 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,321,931 in view of Morano (5,542,670) or Belcastro (5,890,620). Regarding claim 82, Patent '931 discloses all of the structure except for the spout on the cap and the hole for air. Morano and Belcastro disclose similar no-spill drinking apparatus with caps having a spout and a hole for air. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the use of a spout and a hole for air as disclosed by Morano or Belcastro in the apparatus disclosed by the '931 Patent to allow for more efficient drinking from the apparatus and passage of air through the apparatus to allow venting.

Art Unit: 3727

Regarding claims 83-85, 87, 89-92, 107 and 116, the '931 Patent as modified by Morano or Belcastro, discloses all the required structure.

The remaining claims are dependent on claim 82.
